SALE CATALOGUE DISCLAIMER

All reasonable care has been taken in ensuring the information provided in this catalogue is correct at the time of publication. The vendors take no responsibility for the accuracy, reliability and/or interpretation of the information supplied in this brochure. Purchasers must satisfy themselves that the livestock offered meets individual requirements. The vendors retain the right to use photographs and/or information held on particular animals now and into the future.

SAFETY DISCLAIMER

The owners, employees and representatives of Wormbete Simmentals and Valley Creek Simmentals accept no liability for any accidents that may occur at the Allawah Sale Complex. Although such occurrences are rare, any persons attending the Wormbete Simmental Sale do so at their own risk.

MAN ON THE LAND, DO YOU NEED A HAND?

POLY BELT

LIGHTWEIGHT • EASY TO HANDLE • TOUGH

- ✓ Takes away the daylight in yards making stock work calmer minimising bruising.
- ✓ UV stabilised, lasting 25-50 years in harsh conditions.
- ✓ Ideal for troughing which is tough, light weight and cost effective.
- ✓ Tree root moisture & vermin barrier.
- ✓ Proven barrier for cattle, horse, sheep & goat yards, deer, pig & poultry pens, silage & hay covers, grain silos, dam fluming, etc.
- ✓ PolyGard for truck & dolly mudguards.

WELCOME TO WORMBETE SIMMENTALS

It is with enormous pleasure that we present to you this catalogue of bulls and heifers for our fourth on property sale. At Wormbete, we pride ourselves on presenting a superior selection of Simmentals for your consideration and inspection.

The past year has proved to be a positive year for Wormbete and we would like to sincerely thank all those who have supported our stud. Whilst demand for our cattle was high, culminating in the top Simmental price for the year; we were especially pleased to provide to both new and repeat clients a large selection of well valued, quality, sound, fertile Simmental bulls and heifers. Our draft of sale bulls and heifers again display the benchmark attributes we promote and select for and we are excited by the enormous opportunity and potential within these mobs.

We are now a 4.5 star accredited Breedplan herd, meaning that the EBV data supplied to you is backed up by a full complement of Calving Ease, Birth Weight, 200, 400 and 600 Day Weights recording, plus Carcase Scanning Data, Scrotal Measurement and Docility Assessments. Also provided are the results of an Independent Structural Assessment that is undertaken on each animal, which is backed up by a guarantee of no hoof trimming. Together, this wealth of information reinforces our commitment to providing the most accurate, honest and relevant information we can, resulting in a Simmental animal we are confident will suit any commercial or stud enterprise.

In June this year, Wormbete was very pleased to purchase the Triple C stud female herd from respected cattleman and black Simmental breeder, Mr Ian Collie, Wangaratta Victoria. The females we have acquired are nothing short of exceptional and provide additional impetus to the emerging Black Simmental component of our stud, which this year sees the first draft of Wormbete Black Simmental bulls being offered for sale.

Yet again our catalogue provides a full disclosure of the attributes of each individual bull and heifer. Sale animals are scanned prior to sale preparation commencing and demonstrate the ability of our Simmental cattle to perform in the paddock. We aim to keep the balance of carcase quality and weight in our bulls without being extreme. Our stud cattle perform according to seasonal challenges as part of our mixed farming enterprises i.e. they graze on stubble paddocks in summer, they graze on pasture or grazing crops during winter and they exist on a ration of hay during times of drought.

Our polled program continues to be an important part of our breeding with 90% of our sale bulls this year being polled without any sacrifice of quality or performance.

We are again delighted to invite Stuart and Samantha Moeck of Valley Creek Simmentals to join and complement our sale. Stuart and Sam are committed breeders of Simmentals and the standard of cattle from our studs combined will ensure there is something on offer to suit the needs of every buyer.

Thank you for your continued interest and support of Wormbete. We wish you all the very best with your bidding and for the year ahead. Please don't be tempted to rush off after the sale, we look forward to a relaxed chat with our valued clients and visitors and hope that you can stay on and enjoy our post sale hospitality.

Warm Regards,

John, Nicole, Mim and Judy Hopkins

Wormbete & Valley Creek Simmentals Bull Sale

All bulls at the Wormbete & Valley Creek Simmentals sale on the 3rd March 2017 will be STAR accredited.

STAR is a quality assurance program for the stud breeder that ensures steps have been taken to prevent their animals from being carriers or from transmitting preventable reproductive diseases, including *leptospirosis*, *pestivirus* and *vibriosis*.

For a commercial breeding herd, the reproductive integrity is imperative to its continued productivity. For the bull buyer, selecting a STAR accredited bull ensures that you can be confident the animal purchased will not introduce one of the preventable reproductive diseases into your herd.

To qualify to be STAR accredited, the animals are firstly tested to confirm that they are not a lifelong carrier and shedder of pestivirus, (a PI animal). Once determined to be PI free, animals are then vaccinated twice against the reproductive diseases *leptospirosis*, *pestivirus* and *vibriosis*.

Purchasers can therefore be confident that the animals they buy are not going to introduce these preventable reproductive diseases into their own herds.

It is highly recommended that all commercial producers continue to vaccinate their own herds against these diseases to prevent against the dramatic impact that reproductive disease can have on the productivity of a herd.

For more information contact Jock Munro – 0419 496 848

VALLEY CREEK SIMMENTALS

Valley Creek Simmentals was founded in 1999 on traditional European bloodlines with the first female Simmental purchased from Wendouree stud when I was just 16 years old. Since then we have scoured the country side for the best donors we can find.

Our core priority from the start has been to enhance the ket profit driver that is our cow herd, full of moderate framed breeders with softness and the ability to produce under all conditions. Mating decisions are always made with a vision of female progeny uppermost in mind. We are continually trying to optimise growth and carcase traits.

We are extremely proud of the line up of Bulls and Females and thank everyone for the continued support and vote of confidence you have shown in our breeding program. Here at VC we are striving to deliver the best polled simmental genetics available. A feature of this years draft is 2 black bulls, 3 traditional bulls, and 3 red influenced sires.

When you buy VC Simmental genetics you will get a "Modern" Simmental industry focussed animal. The resulting progeny will calve easily, grow, finish quickly and grade higher and add EMA.

Our main focus:

- **Phenotype**

Whilst we use the very latest of breeding technologies, phenotype is a major part of our breeding program. Our bulls will be quiet, polled, have great skin type and exhibit weight, softness and easy doing ability.

- **Calving Ease**

Here at VC we took the initiative 2 years ago to weigh every calf born, this ensures that the data supplied is 100% accurate. So whether you buy a terminal or a self replacing sire from us you will have an accurate estimation to the weight of your calves. We also record calving ease, scrotal and gestation length.

- **Growth is the Key**

Weight is "Money". Cattle must grow quickly to meet MSA Standards. They must be in a moderate, mature weight package to maintain positive fat scores and effective replacement females.

- **Carcase Focussed**

We use ultrasound scanning for EMA, IMF% and fat cover as a major selection criteria. Combined with weight for age data, this gives us the strongest information on what our cattle can do. This data is then submitted to Breedplan for evaluation.

We are extremely grateful to John and Nicole Hopkins for giving us this opportunity to join them in the on-property 4th Annual Sale. We believe that both studs combined will ensure that there is something on offer for every bodies needs.

We thank you and our valued clients, we hope you like our hospitality and enjoy your purchases.

Kind Regards,

Stuart and Samantha Moeck

SALE INFORMATION

INSPECTION

We welcome inspection of the cattle before the sale to provide you with the necessary time to ensure you are selecting the correct bull or female for your program. Please contact John on 0427 102 748 or Stuart on 0419 465 242 to arrange this. Inspections will be from 10am on sale day, Friday 3 March 2017. Selling will commence at 1pm. All times quoted are NSW Daylight Savings time.

DIRECTIONS

The sale will be held on property at "Allawah" ILLABO, which is located 7kms south east of the village of Illabo. From Illabo, turn over the railway line and veer left towards Eurongilly and travel south east on Eurongilly Road for approximately 4kms then turn left into Allawah Road and travel 3.4kms to "Allawah". The property entrance is located on the right.

TRANSPORT

Ben Makeham of Makehams Transport will be present on sale day and is the recommended carrier.

Wormbete and Valley Creek will offer FREE CARTAGE:

- to buyers residing within a 100km radius of the Allawah sale complex.
- along the major route from Illabo to Dubbo in the north and from Illabo to Wodonga in the south.
- Australia-wide (mainland) to any registered individual buyer who purchases three (3) or more sale lots (excluding semen lots).

Please note: The free cartage rebate does not apply to Lot 67.

REBATE

Selling agents are Landmark and GTSM. Outside agents are entitled to a 4% rebate under the following conditions:

- introducing the buyer in writing to the selling agent at least 24 hours prior to the sale and settling within 7 days, and
- the agent who has provided the introduction must attend the sale with their client or on the clients behalf.

HEALTH

Both Wormbete and Valley Creek herds are Protected JD herds. All cattle have been tested negative for Pestivirus. Wormbete Simmentals and Valley Creek Simmentals aim to maximise the health and reproductive reliability of their stud animals by undergoing the Zoetis Star program. All bulls have undergone a full 7in1, Pestigard and Vibrio vaccination program. All heifers have undergone a full 7in1 and Pestivirus vaccination program. Both bulls and heifers have also received Multimin injections.

Wormbete cattle were drenched with Dectomax prior to sale. Valley Creek cattle were drenched with Ivomec prior to sale.

STRUCTURAL ASSESSMENT

Sale lots have been inspected and passed an independent structural accredited assessment. All assessments are published in the sale catalogue.

Wormbete cattle were inspected by Liam Cardile of BeefXcel (Accreditation No. 1033) on 19 December 2016.

Valley Creek cattle were inspected by R. Evans of Bovine Scanning Services (Accreditation No. 1018) on 25 January 2017.

PHONE BIDDING

If you are unable to make it to the sale, phone bidding can be arranged by contacting either the selling agents, John or Stuart.

TRANSFER

All sale cattle are registered with Simmental Australia and are eligible for transfer to your ownership.

INSURANCE

We recommend insuring your purchases at the fall of the hammer. A Landmark representative will be present on sale day to assist with this.

CATERING

Morning tea and lunch will be available on sale day with compliments of the vendors. Complimentary refreshments will be offered post sale.

ACCOMMODATION

If you require accommodation in the area, we are happy to provide details based on your travel origin. A range of accommodation options are available in nearby towns, Junee, Cootamundra, Gundagai and Wagga Wagga. Please contact us if we can be of assistance.

SAFETY OF VISITORS

When entering sale pens, please ensure your safety by taking note of your surrounds and do not crowd sale animals. We recommend that persons under the age of 16 do not enter sale pens. Animals being offered for sale are selected for their quiet temperament under normal yard handling and paddock conditions, as our youngest team member is 12 years old, however sale day is not considered a normal day in the life of a bull or heifer and is quite different to anything they have ever experienced. We need to be aware of this and request that you use common sense and be alert at all times. We do not envisage any problems on sale day but feel it is our duty of care to advise you of the importance of respecting our policy of always practicing the responsible husbandry of cattle.

GST

All lots are sold exclusive of GST.

GUARANTEE

To the best of our knowledge all of the cattle are in sound working order at the time of the sale and have been independently evaluated for structural soundness, tested negative to Pestivirus and Zoetis Star vaccinated.

Following the sale, it is important that normal care be taken and good husbandry practices be observed with regard to the management of your purchase. In the rare event of a bull proving to be infertile or incapable of natural service within 6 months of the purchase date, the vendor will credit the purchase price, less the salvage of the bull, provided the problem is not caused by injury, illness or disease incurred after taking delivery.

Claims must be accompanied by a relevant veterinary certificate where requested by either vendor. Vendors retain the right to obtain an independent veterinary confirmation of any claim.

BRINGING YOUR BULL OR HEIFER HOME

Our bulls and heifers have always been run in mobs and never on their own. We recommend that when you bring them home you have some other cattle in the yards so they have company to settle in with. Feed them in the yards and give them time to become familiar with their new surrounds. Wormbete cattle have never been on a truck so that too will be a new experience for them.

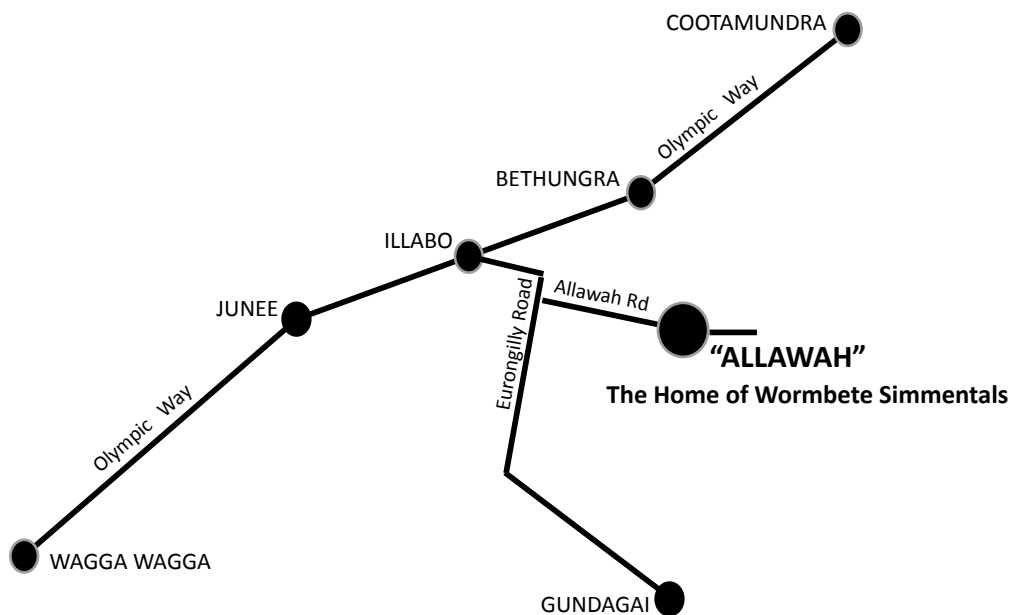

Our cattle have been mustered predominantly by motor bikes, and have also been mustered by horse and worked by kelpie dogs.

LOCATION MAP

"Allawah" is located 68kms north east of Wagga Wagga (50 minutes drive), 25kms north east of Junee (29 minute drive) and 35km south west of Cootamundra (30 minutes drive). Please Note: Detailed directions from Illabo are listed in the Sale Information page.

PLEASE BRING THIS ONE WITH YOU, THANK YOU**

SIMMENTAL GROUP BREEDPLAN - UNDERSTANDING THE FIGURES

The EBV is the best estimate of an animal's genetic merit for that trait. An accuracy is presented with every EBV and gives an indication of the amount of information available in the calculation of that EBV. Accuracy below 75% is considered low.

JANUARY 2017 SIMMENTAL GROUP BREEDPLAN EBV'S FOR 2015 BORN CALVES (ABBREVIATED)										
	BW	200D	400D	600D	SS	EMA	RIB	RUMP	RBV	IMF
BREED AVERAGE	+0.9	+18	+32	+41	+0.5	+2.4	+0.2	-0.1	+0.6	+0.3

BIRTH

BWT: is based on the measured birth weight of animals and adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth.

GROWTH/WEIGHT

200D (KG) is calculated from the weight of the animals taken between 80 and 300 days of age and is the best estimate of an animal's genetic merit for growth to early ages.

400D (KG) is calculated from the weight of progeny taken between 301 and 500 days of age and is the best estimate of an animal's genetic merit for yearling weight.

600D (KG) is calculated from the weight of progeny taken between 501 and 900 days of age and is the best estimate of an animal's genetic merit for growth beyond yearling age.

FERTILITY

SCROTAL SIZE (SS) (CM) is an indicator of male fertility in regards to semen quality and quantity. Higher EBV's indicate higher fertility. SS is also positively associated with female fertility.

CARCASE

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in EMA at the 12/13th rib. A higher EBV indicates better muscling on animals.

RIB: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RUMP/P8: Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV: Retail Beef Yield (%) represents total (boned out) meat yield as a higher percentage of a carcass. A more positive EBV indicates higher percentage yield.

IMF%: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of fat to muscle in the eye muscle. Depending on market targets, larger more positive values are generally more favourable.

PLEASE NOTE: ONLY JANUARY 2017 SIMMENTAL TRANS TASMAN GROUP EBV'S CAN BE VALIDLY COMPARED BETWEEN HERDS

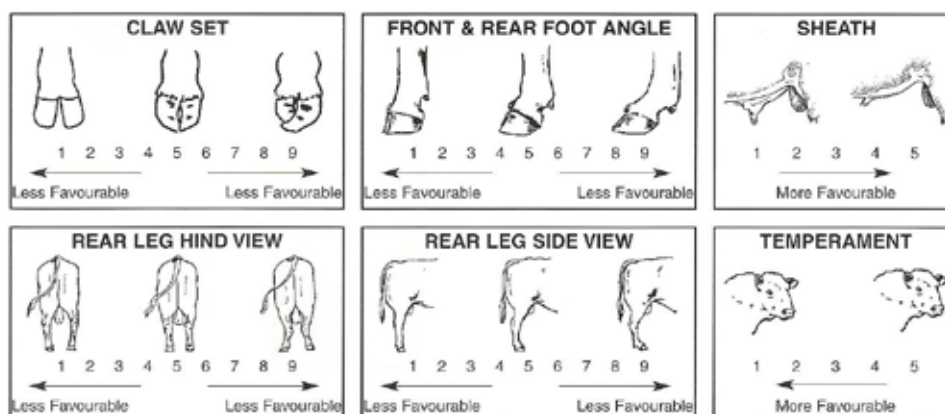

BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

Structural problems in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain reducing the overall productivity of the Australian Beef Industry.

Over the past decade, the use of the Beef Class Structural Assessment System in the seedstock industry has produced a marked improvement in herds which have shown commitment to using the information appropriately. Through these dedicated breeders there has been a flow on effect of structural improvement throughout all sectors of the beef industry.

HOW TO USE THE SYSTEM: The Beef Class Structural Assessment System uses a 1-9 scoring system:

- A score of 5 is ideal. (Note: Temperament Score of 1 is preferable).
- A score of 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal.
- A score of 2 or 8 are low scoring animals and should be looked closely at before purchasing.
- A score of 1 or 9 should not be catalogued and are considered culls.

A commanding presence elevates Landmark to the Lot 1 position to lead off the 2017 sale draft. Good bone, muscle, softness, an awesome temperament and great leg structure add to his sire appeal. His dam D92 is a sensational cow with great maternal attributes and capacity. Depth and volume lands Landmark as one of the picks.

Le-Boss is a well covered bull who exhibits docility, softness and depth. Out of a moderate framed maternal cow, he is the product of a successful AI joining to the Canadian sire Erixon Pit Boss. For us, our black genetics must equal those of our traditional herd, and Le-Boss easily holds up his end of the bargain. One to consider if you are looking to inject meat and softness into your herd.
Homozygous Polled, Homozygous Black.

Prized genetics are on offer here, with the maternal pedigree of this bull well recognised on the show circuit and highly sought after. The influence of TNT Tanker in Australia has been immense and this bull demonstrates why. Packed with muscle and power and flaunting a great back end, Led Zeppelin displays plenty of length and visual appeal.
Homozygous Polled, Homozygous Black.

5	6	5	6	4	5			2

Smooth, polled, dark red heifer with great structure. Her twin sister has been retained in herd and it was difficult to pick between the two. Both sire and dam are dark red and goggled ensuring a consistency of colour and type. Millie L42 was AI'd to the impressive New Zealand sire Glen Anthony Y-Arta AY02 (P) on 28.08.2016 and covered by Wormbete Leonardo L108 (P) from 14.09.2016 to 02.11.2016. PTIC.

It is no secret how influential Callendale Frank has been here at Wormbete. His ability to inject strong poll genetics into our herd without compromising on carcass quality has been well documented and observed. At 7 years of age, he still stands as a bull with stature and movement and displays exceptional temperament which he passes onto his progeny. With an EMA and Retail Beef Yield (RBY) in the top 10% for the breed, his carcass power is proven. Homozygous polled. Selling three packages of 10 straws.
